Education

Bachelor of Applied Sciences and Engineering | University of Toronto **2020-2025**

- Major in Computer Engineering, with a Professional Experience Year (PEY) Co-op
- Minor in Artificial Intelligence and Machine Learning
- Courses of interest: Algorithms & Data Structures, Probabilistic Reasoning, AI, ML, Deep Learning, Software Design & Engineering, Databases, Computer Organization/Networks/Security, Operating Systems

Experience

Associate CE Engineer | FedEx Express | Toronto **May 2023 – July 2024**

- Developed an application in Python/JavaScript, to interface between business databases and systems (SQL)
- Created automation solutions with SQL & Python to save up to 40% of time on data input in brokering tasks
- Consulted weekly with brokers from design to deployment to ensure the automation solution fit their need
- Optimized assignment of tariff classification numbers for high-value goods, setting up pipeline and using multinomial logistic regression, reducing assignment time by 30% for top 10 FedEx customers

DTLP Intern | General Electric (GE) Corporate | Toronto **June – August 2022**

- Researched Auditing processes of GE's Financial Data Lake (FDL) to find opportunities for improvement
- Improved Hash Audit Automation program (Java) accuracy by 14%, saving 500 mins/day of work for DQ team
- Used Spark to integrate the Hash Audit program to the real-time big data processes of the DQ team

Projects

Winner of Best "U of T Hack" | U. of Toronto Hacks 12 Hackathon **Jan. 2025**

- Built website in 36hrs to turn YouTube videos into interactive language lessons in any language (React, Firebase)
- Used Transcript API to extract text from YouTube videos, Cathoven API to determine the language level and ChatGPT to generate tailored questions and evaluate understanding of users, to tailor future recommendations

Full-stack Developer | Groupify Capstone Project | U. of Toronto **Sept. 2024 – Present**

- Performed teammate matching for students in U of T Engineering courses, using k-means and greedy algorithms
- Developed Figma prototype and React frontend, ensuring usability through unit, integration and user testing
- Integrated frontend with Django backend containing PostgreSQL database and algorithm using REST API
- Presented the application to professors and students, earning praise and leading to release of first version

Full-stack Developer | U. of Toronto Marketplace Hub **Sept. 2024 – Present**

- Created and deployed marketplace for U of T students with team of 7, used Flask, React and PostgreSQL
- Performed testing in a CI/CD pipeline, using a *pytest* test suite, Selenium, and a containerized database (Docker)
- Accumulated 50+ users buying/selling near campus, reducing environmental footprint and building community

Team Leader | Geolocation of images with CNN | U. of Toronto **Sept. 2023 – Dec. 2023**

- Led a team of 4 to design a Deep Learning algorithm for image geolocation
- Trained ResNet 50 CNN on 32,000 Google Street View images from locations on adaptively partitioned map
- Achieved better-than-human performance by tuning hyperparameters: LR, batch size, epochs, fine-tuning vs. feature extraction, etc., presented results in report and presentation and [demo](#)

Skills

- Programming: Python, Java, JavaScript, C, C++, HTML/CSS, Kotlin
- Frameworks: Spark, TensorFlow, PyTorch, Flask, Django, Node.js, React, React Native
- Databases: MySQL, PostgreSQL, Teradata SQL
- Libraries: NumPy, Pandas, Scikit-Learn, Matplotlib, Selenium
- Tools & Technologies: Git, Docker, JIRA
- Languages: Native proficiency in French and in English, C1 level in Spanish, B2 level in German

Extracurriculars

Varsity Athlete (Fencing) | U. of Toronto Varsity Blues Team **Sept. 2021 – May 2024**
